

Meningitis Vaccine

We are considering requiring the meningitis vaccine for all new students. If you require it, could you please give me the contact information for your health center so we can borrow/review/steal the language from the health forms?

Spelman College

We require it at Spelman. Our health center director is Brenda Dalton. She can be reached via e-mail at bdalton@spelman.edu.

Trinity University

We have recommended the meningitis vaccine for a number of years and it has been listed on the immunizations section of the Health Services Health Record required of new students. We have a section for required immunizations and a section for recommended immunizations.

With the state law now requiring it for new students (starting with those entering in January 2010) we will move the meningitis vaccine from the recommended section to the required section of that form. Here's a link that will show you the current form:

http://www.trinity.edu/departments/health_services/health_record.pdf

The meningitis vaccine is "meningococcal tetravalent."

University of Richmond

We have chosen to follow the state of Virginia guidelines. The state of Virginia Guidelines requires the vaccine unless you sign a waiver.
