

**Developing Slide Presentations for Spanish Language Instruction**  
Erika Zettl, Southwestern University (Modern Languages)

This is an interim progress report as the project is still underway. The project will be completed by May 2005 and a website will be up so that other may access the slide presentations and adapt them as they choose.

So far I have power point presentations for the first semester Spanish and miscellaneous grammar presentations and exercises. There have been some yet unsolved difficulties putting these slides into a web format without losing the audio. As soon as that is resolved, I will send you an update and let you know that the first semester slides are available to others.

Project: The purpose of this project is to develop power point presentations covering the vocabulary and grammar studied in first through third semesters of Spanish: specifically covering chapters Ante Todo through eighteen from the text *Puntos de Partida: An Invitacion to Spanish* 6th edition (McGraw Hill). These slide presentations are intended as supplemental material to be used by students and faculty. They may be in or outside the classroom as desired by the instructor.

Best regards, Erika Zettl
