

Progress Report for ACS Information Fluency Project Grant 2001

**Fostering Information Fluency in the Introductory Biology Laboratory
Rhodes College**

I have prepared tentative exercises for the Zoology Laboratory course to be taught in the Spring. I have yet to coordinate with the reference librarian to organize her part or with the others teaching the course. I've set time aside in my schedule in November to do this and will be editing our lab manual to incorporate it. I will use a student to run through the exercises as their being prepared.

It seems I'm not far along - and I'm not - but I am on my proposed schedule since this is a prep term for the implementation in the Spring.
